ADVANCE ORDERS

All advance orders are received subject to crop and other conditions which are beyond our control. We reserve the privilege of supplying only a part of an order, but in no case will we make a substitution without consulting the purchaser.

FRIENDS OF THE TRADE.

It has been our endeavor in growing the stock offered in this little booklet, to offer only the very best varieties. Those that have already proven their value to the trade and a few of the newer novelties which we believe will prove profitable.

The stock offered is all grown in our own establishment and by the elimination of artificial growing conditions we believe that we are offering you a product of superior quality. Our stock from which these seeds are grown are plants grown from the originators' strain and plants used for seed production are carefully selected. All seed after being harvested and cured, are fully tested to determine the percentage of germination.

After taking the above precautions to supply you with a product of the highest quality we go still farther and protect the germination of this product by the following **guarantee**, which we believe you will concede is the fairest of any, under which seed were ever sold.

GUARANTEE OF GERMINATION.

We guarantee that every packet of Snapdragon, (Antirrhinum,) seed supplied by us will contain in excess of 1500 seed and that with usual care each packet will produce at least one thousand plants. Should for any reason they fail to do so, upon proper notification, we will replace packet for packet those that do not fulfill this guarantee. It is understood however that in the event of the purchase of a number of packets of one variety, and they fail to comply with the term of this guarantee, that replacement will be made on the aggregate and sufficient seed supplied to make up any deficiency.

It is also understood that in no case will we assume a responsibility greater than the original purchase price of the stock supplied under this guarantee.

HARROLD'S GREENHOUSES

GRANTS PASS, OREGON.

FLORIST'S STRAIN SNAPDRAGONS

Following will be found a brief description of the several varieties which we offer and at the end of the list will be found **our prices, which are uniform on all varieties** offered in packets. We believe you will find them very attractive, if quality goods are a consideration. All varieties marked thus (*), are ready for immediate delivery. Those not marked will be ready in early July, sufficiently early for planting.

AFTERGLOW:- Golden bronze.

This fine, early flowering bronze is very attractive.

***CEYLON COURT:-** Canary-yellow.

Fine, early, long stemmed and without doubt the finest pure yellow.

CHEVIOT MAID:- Pink.

The finest strictly early flowering pink. A winner!

***GENEVA PINK:-** Rich rose pink.

This well known medium early, is widely grown

GOLDEN PINK QUEEN:- Color as named.

Reasonably early and a favorite with many.

HARROLD'S WHITE:- *NEW*.

Medium early. The only absolute pure wax white.

HARROLD'S RED:- *NEW*. Deep wine.

Fairly early and very rich of color.

HELEN:- Beautiful salmon.

Early and free flowering.

***JENNIE SCHNEIDER:-** Columbia pink.

Moderately early and a wonderful color.

JUDD'S COLUMBIA:- light rose pink.

Fairly early and produces fine large flowers.

JUDD'S PREMIER:- Rose.

Same as above, but of darker color.

LAURA:- Deep rose.

Not extra tall but free flowering and early.

LAURENE HARROLD:- *NEW*.

Blended pink and yellow, of sunset tints. Fairly early and very attractive.

***ORLANDO:-** Bronze.

Moderately early and a favorite in this color.

***PENN ORANGE:-** Tangerine orange.

Earliest of this color but flowers are poorly placed.

***PHILADELPHIA PINK:-** Light rose.

A standard fairly early, long stemmed variety.

ROMAN GOLD:- Golden yellow suffused pink.

Medium early and quite attractive.

***SILVER PINK:-** Light pink.

Gets too light in hot weather but very free flowered

SUNBURST IMPROVED:- Sunburst Rose.

Fairly early and a fine color.

***WHITE ROCK:-** White.

Standard white. Long stemmed and early.

**Any of the above, your selection, at
the following uniform prices.**

1 packet \$1.00; 3 packets \$2.50; 7 packets \$5.00;
15 packets \$10.00; 25 packets \$15.00. If you can use
an ounce or more of a variety, it will pay you to ask
for our bulk seed pricelist.

SMALL FLORIST SPECIAL.

Realizing that there are thousands of small growers who will not require a thousand plants of any one variety to meet their need, we offer this special collection for their approval. We will supply you a quarter packet each of any four varieties listed here, at \$1.50 per collection. As these collections carry our regular guarantee they assure you 250 plants each of any four separate varieties that will best meet your needs.

PLANTS

We try too maintain a complete stock of these on hand for immediate shipment, although at times heavy demand exhausts some varieties temporarily. Usually we can make prompt delivery from August first to the following March. This season however, owing to the condition of our seed supply, those varieties listed here in for seed delivery in July or later, will not be ready in the two inch and transplanted sizes before about September first, with seedlings ready about thirty days earlier. All other will be ready in August.

SEEDLINGS

Any variety offered in this list, \$1.00 per 100; \$9.00 per 1,000.

TRANSPLANTED

Any variety, \$2.00 per 100; \$18.00 per 1,000.

FROM TWO INCH POTS

Pinched and branching, any variety, \$3.75 per 100; \$32.50 per 1,000.

STATE QUARANTINES:

All plants offered herein are grown under Oregon state license, issued by the Oregon State Board of Horticulture. Our grounds and greenhouse are regularly inspected and certified to be apparently free from all dangerous fungus and insect pests. Plant or seed regulations, of other states, which may delay, damage, or destroy any goods are at purchasers risk. If your state imposes strict regulations which may delay perishable stock, please so state at time of ordering.

TO OUR TEXAS FRIENDS

We have complied with all of the regulations and paid the license fee stipulated by the state of Oregon and we assume that you have done the same to do business in your state. That is as it should be! However the Texas

Department of Agriculture tells us we must obtain a license from it, — of course the fee must not be overlooked! — to ship greenhouse stock to growers in Texas. As we have no representative residing in that state, we question the constitutionality of such a tax on interstate commerce and believing that such a tax if permitted to continue in one state with out question, might eventually become a menace through general adoption, to our trade, we refuse to comply. So we will be unable to supply Texas growers, plants.

This does not effect seed movement however, and we assure you that any order for seed will receive our very best attention.

A FEW CULTURAL SUGGESTIONS.

Snap seed germinate best in an atmospheric temperature of 55° to 70°, with reasonable ventilation.

Laying a pane of glass on top of a seed flat so as to exclude all ventilation is poor practise.

Keep seed flat moist at all times, but never soak.

Soil should be mellow so it won't bake.

Excessive fertilization must be garded against, as over growen, soft plants are easly attacted by rust. On the other hand plants must not be stunted.

Fungus in seed flats can best be controled with Sulphur flour.

The best control we know of for rust is to keep it from getting started through steril growing conditions.

Should rust appear, burning of infected parts or plants is the shurest method of eradication.

Watering should be done early in the day so that foliage will not be wet under a scalding sun or at night.

If you have trouble in growing Snaps possably if you let us have a decription of your difficulties we may be able to offer suggestions which well be of help.

Remember: Harrold's seeds produce profitable crops.

This list cancels all previous lists.
